

Do not let NAB interfere with XM Radio's right to broadcast local weather and traffic reports. This is an invaluable service in the DFW Metroplex. I have to sit through 15-20 minutes of crap on local radio stations before I learn about the accident, road work, storm system, weather alert, etc. after I have already passed the accident or the tornado has already hit.

This is a First Amendment Right allowed by our Constitution. NAB has fought for their rights in the past and won. Just because the competition (XM) is doing a better job does not give AM & FM radio conglomerates the right to stifle the competition. XM has the same rights as AM & FM owners. XM has the right to broadcast traffic and weather the same (or better) as AM & FM.

NO TO HR 4026!!!
